PROFESSIONAL SUMMARY

Experienced professional with 3 years in full-stack web and mobile application development. Proficient in Angular, Ionic, Firebase, and Google Cloud Platform (GCP), with strong expertise across both frontend and backend development. Proven ability to build scalable, cross-platform solutions, implement real-time features, and optimize performance. Skilled in Agile environments, solving complex problems, and delivering reliable, user-focused applications.

TECHNICAL SKILLS

- Angular
- Ionic Framework
- Firebase
- Google Cloud Platform
- NodeJS
- MySQL
- Bootstarp
- TailwindCSS
- Javascript
- CSS
- HTML
- GIT
- GITHUB
- Typescript

EXPERIENCE

Adaptive Development Private Limited

Jan 2025 - Present

Software Engineer

- Designed and developed web and hybrid mobile applications using Angular and Ionic, delivering consistent cross-platform experiences.
- Built and deployed iOS and Android apps using Ionic Capacitor, with experience in App Store submission and release management.
- Built and maintained scalable backend systems using Firebase (Firestore, Cloud Functions, Authentication) and Google Cloud Platform (GCP).
- Integrated real-time updates, push notifications, and offline support to enhance user interaction and app reliability.
- Worked with Jira to manage tasks, track bugs, and collaborate in Agile/Scrum development cycles; participated in sprint planning, daily standups, and retrospectives.
- Created reusable UI components with responsive layouts and ensured accessibility standards were met.
- Implemented secure authentication flows and integrated third-party APIs as needed for business requirements.
- Deployed and managed apps via Firebase Hosting and handled CI/CD pipelines for streamlined releases.
- Conducted code reviews and optimized performance for better user experience and scalability.

Associate Software Engineer

- Assisted in developing Angular web applications and hybrid mobile apps using Ionic.
 - Contributed to frontend features, backend integration, and debugging across platforms.
 - Supported app deployment processes and gained exposure to Android and iOS build workflows.
 - Used Firebase for user authentication and database management.
 - Participated in Agile development practices and collaborated using Jira and GitHub.
-

PROJECTS

Pet Parent

- Developed features to manage pet profiles, including age, breed, medical history, and notes.
- Built modules to schedule vaccinations, set feeding reminders, and track daily activities.
- Implemented secure storage for vet records, prescriptions, and health certificates.
- Designed user flows to support daily pet care with an intuitive, responsive UI.
- Enabled persistent real-time syncing of pet data across devices using Firebase services.

Lumati

- Designed and implemented modules for tracking user health sessions and wellness routines.
 - Built intelligent notifications for reminders like eating times, hydration, and activity logging.
 - Integrated AI to extract and summarize client reports automatically from wellness interactions.
 - Developed stack monitoring features to assess user engagement, session completion, and long-term wellness trends.
 - Ensured real-time data handling and smooth cross-platform performance for web and mobile users.
-

EDUCATION

St.Xavier's college (Autonomous)

Jun 2019 - May 2022

B.Sc Mathematics

CERTIFICATES

Certificate of Completion – Core Java and SQL Training

Completed a professional course focused on backend development using Core Java and SQL. Practiced writing basic programs and gained a solid understanding of programming fundamentals and database concepts.
